Scaling and the ATAR

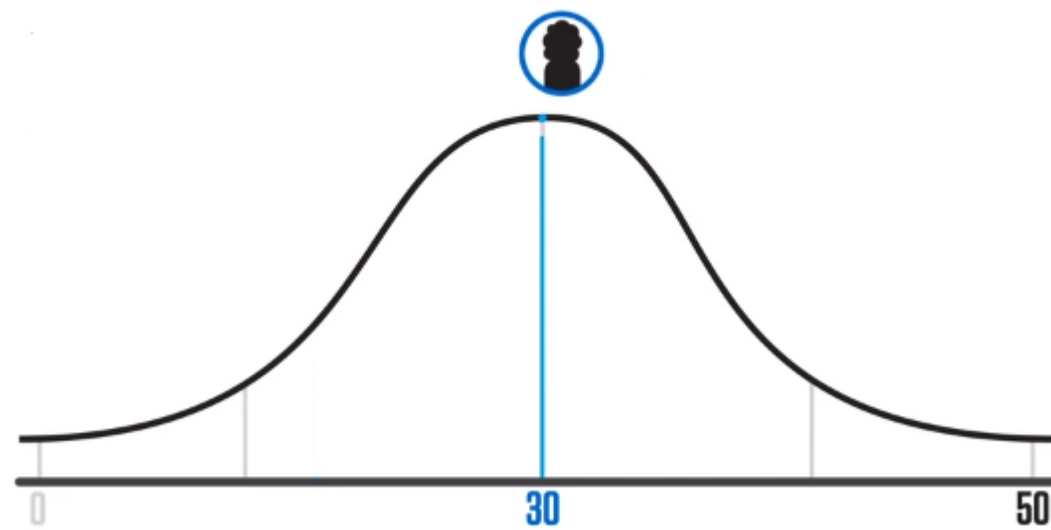

Australian Tertiary Admission Rank (ATAR)

What is it?

- A tool for tertiary selection based on relative performance in the VCE
- It's a rank, not a score

How is it calculated?

1. VTAC receives your study scores from VCAA and **scales** them for fairness
2. Your **aggregate** is calculated from the highest permissible combination of your subjects
3. The aggregates for everyone are placed in order for conversion to the **ATAR**, which is a percentile scale

The scaling process

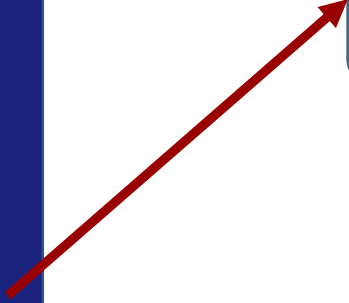

Chemistry
Raw study score average: 30

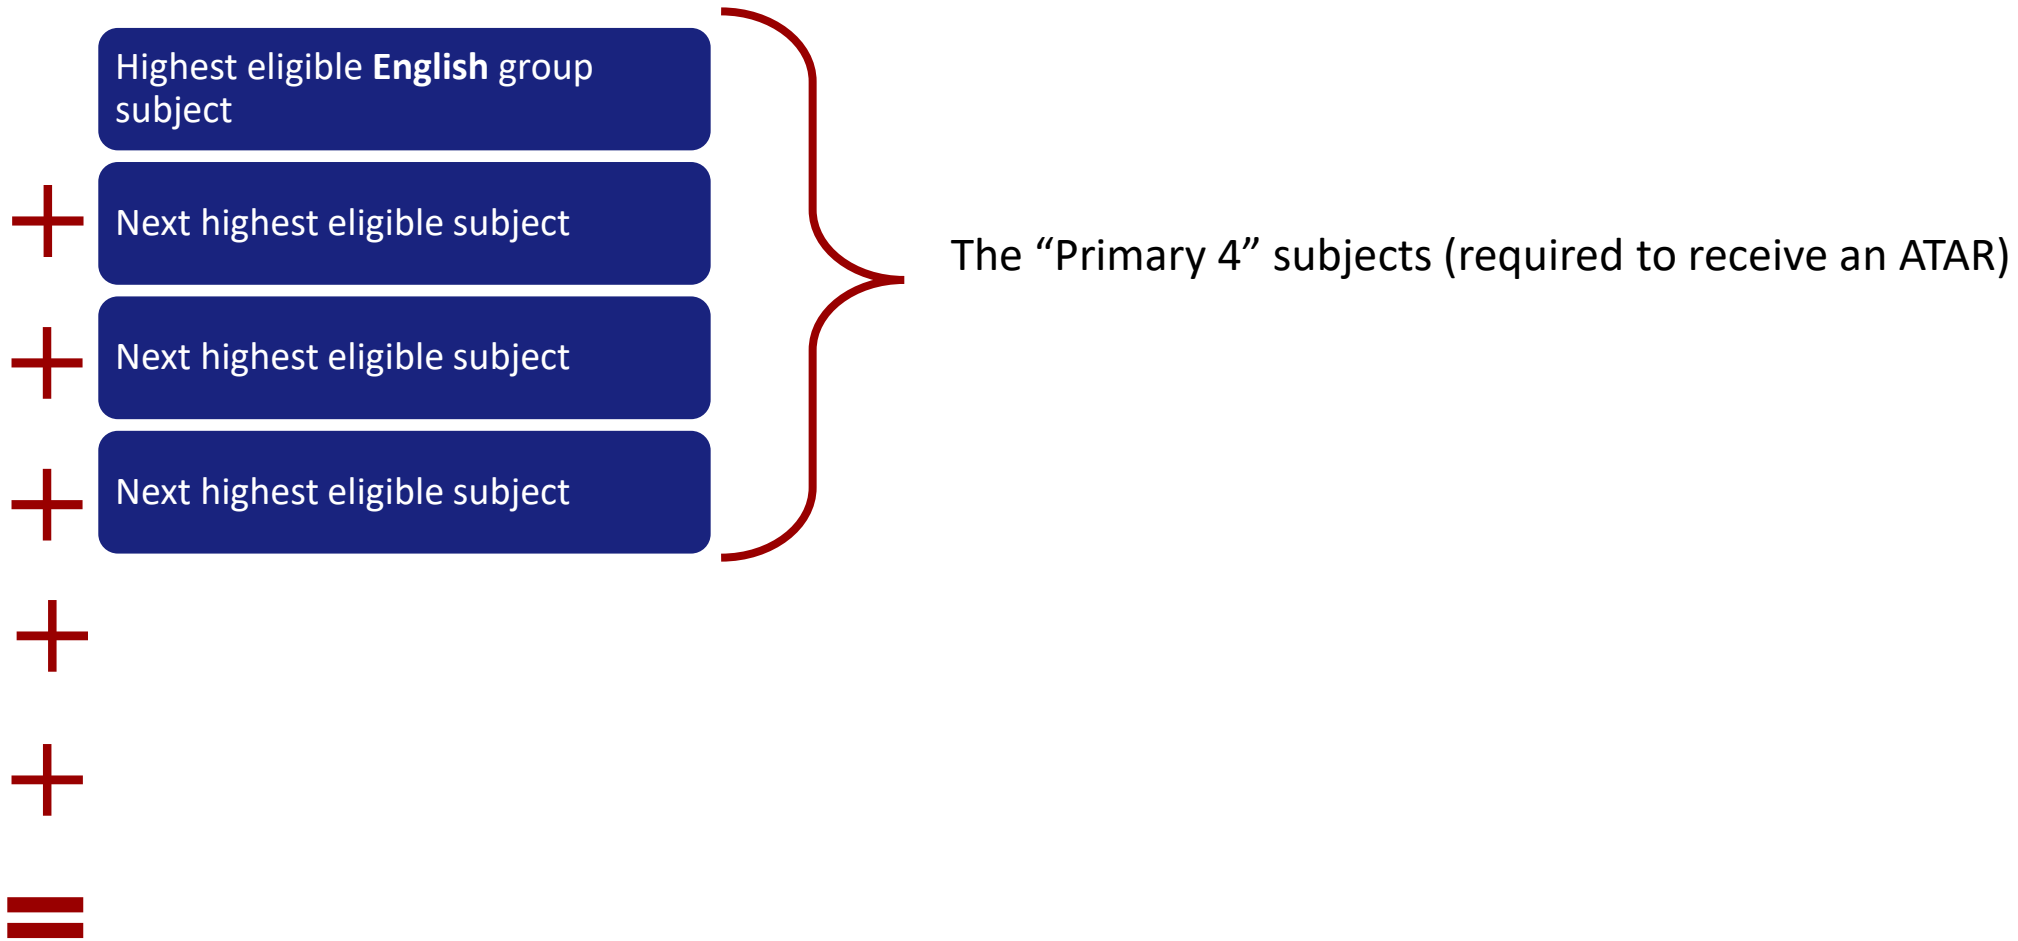

Results for all Chemistry students in Victoria:

English	31.35
Music Performance	36.62
Further Mathematics	33.45
Psychology	28.51
Politics	34.11
Biology	33.72
Etc.	31.52
Average for all studies	32.75

Chemistry
Scaled study score average: 32.75

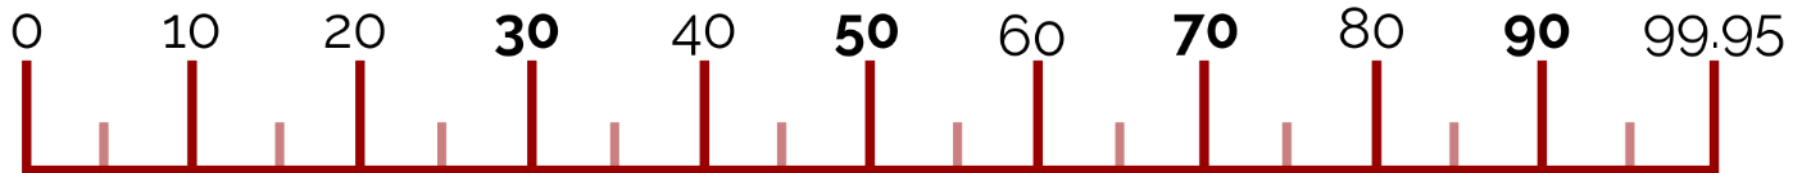

Composition of the aggregate

1

Aggregates

All aggregates are arranged in order.
Minimum = 0 Maximum ≥ 210

2

ATARS

Aggregates are placed
on a percentile scale to
produce ATARs

Minimum = 0.00
Maximum = 99.95

ATAR of 30.00
= performed above
30% of the age
group

ATAR of 50.00
(median)
= performed
above 50% of the
age group

ATAR of 70.00
= performed above
70% of the age
group

ATAR of 90.00
= performed above
90% of the age
group

Note: This diagram uses
simplified figures and processes
for the purpose of clarify. Refer
to the VTAC website for more
details about calculating the
ATAR.

Remember: the ATAR isn't everything

- It's just a tool for getting into (some) tertiary courses
- Many courses use criteria instead of, or in addition to, the ATAR
- Your **selection rank** for a particular course may be higher than your ATAR due to published adjustment factors.
